Microsoft Azure Virtual Training Day: AI Fundamentals

Introduction to AI

Learning Objectives

You will learn the following concepts:

- Artificial Intelligence in Azure
 - What is Artificial Intelligence?
 - Common Artificial Intelligence Workloads
 - Artificial Intelligence in Microsoft Azure
- Responsible AI
 - Challenges and Risks with AI
 - Principles of Responsible AI

Lesson 1: Artificial Intelligence in Azure

What is Artificial Intelligence?

Software that imitates human capabilities

- Making decisions based on data and past experience
- Recognizing abnormal events
- Interpreting visual input
- Understanding written and spoken language
- Engaging in dialogs and conversations

Common Artificial Intelligence Workloads

| | | |
|---|-----------------------------|---|
|  | Machine Learning | Predictive models based on data and statistics – the foundation for AI |
|  | Anomaly Detection | Systems that detect unusual patterns or events, enabling pre-emptive action |
|  | Computer Vision | Applications that interpret visual input from cameras, images, or videos |
|  | Natural Language Processing | Applications that can interpret written or spoken language |
|  | Conversational AI | AI agents, (or <i>bots</i>), that can engage in dialogs with human users |

Artificial Intelligence in Microsoft Azure

Scalable, reliable cloud platform for AI

- Data storage
- Compute
- Services

Azure Machine Learning

A platform for training, deploying, and managing machine learning models

Cognitive Services

A suite of services developers can use to build AI solutions

Azure Bot Service

A cloud-based platform for developing and managing bots

Lesson 2: Responsible AI

Challenges and Risks with AI

| Challenge or Risk | Example |
|---------------------------------------|---|
| Bias can affect results | A loan-approval model discriminates by gender due to bias in the data with which it was trained |
| Errors may cause harm | An autonomous vehicle experiences a system failure and causes a collision |
| Data could be exposed | A medical diagnostic bot is trained using sensitive patient data, which is stored insecurely |
| Solutions may not work for everyone | A predictive app provides no audio output for visually impaired users |
| Users must trust a complex system | An AI-based financial tool makes investment recommendations - what are they based on? |
| Who's liable for AI-driven decisions? | An innocent person is convicted of a crime based on evidence from facial recognition – who's responsible? |

Principles of Responsible AI

Fairness

Reliability & Safety

Privacy & Security

Inclusiveness

Transparency

Accountability

<https://www.microsoft.com/ai/responsible-ai>

DEMO

Responsible AI

Module Overview

We covered the following concepts:

- Artificial Intelligence in Azure
 - What is Artificial Intelligence?
 - Common Artificial Intelligence Workloads
 - Artificial Intelligence in Microsoft Azure
- Responsible AI
 - Challenges and Risks with AI
 - Principles of Responsible AI

Machine Learning

Learning Objectives

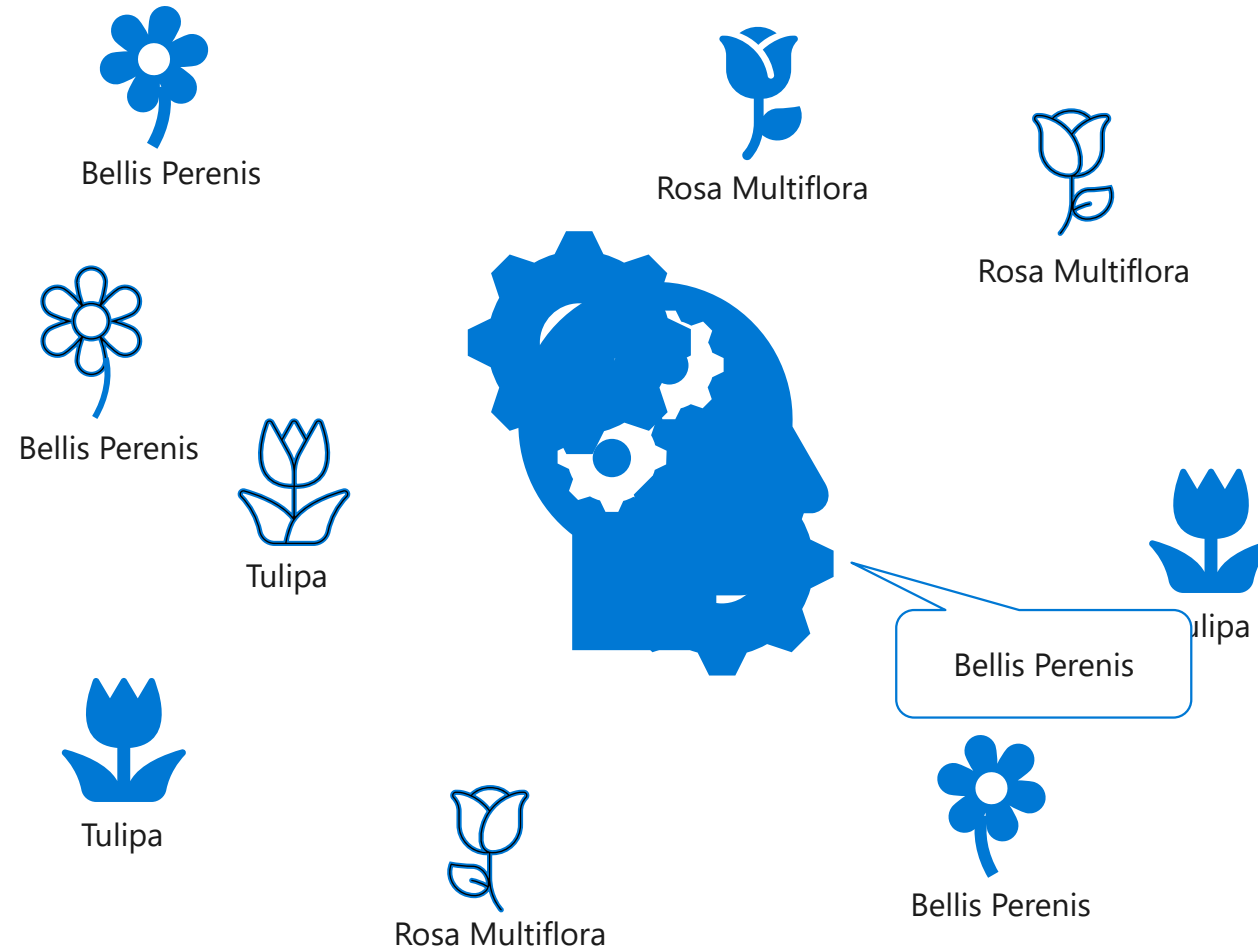

You will learn the following concepts:

- Introduction to machine learning
 - What is machine learning?
 - Regression
 - Classification
 - Clustering
- Azure Machine Learning
 - What is Azure Machine Learning?
 - Azure Machine Learning designer
 - Automated Machine Learning

Lesson 1: Introduction to Machine Learning

What is Machine Learning?

Creating predictive models by finding relationships in data

Regression

| Training |  x |  y |
|------------|--|--|
| | 56 | 115 |
| | 61 | 126 |
| | 67 | 137 |
| | 72 | 140 |
| | 76 | 152 |
| Validation | 82 | 156 |
| | 54 | 114 |
| | 62 | 129 |
| | 68 | 130 |
| | 74 | 152 |
| | 80 | 154 |
| | | $f(x)$ \hat{y} |
| | | 116 |
| | | 128 |
| | | 137 |
| | | 146 |
| | | 155 |

Classification

| | <div><div><div><div></div><div></div></div></div><div><div></div></div></div> | |
|------------|---|---|
| | x | y |
| Training | [4,2,3.2,10] | 0 |
| | [6,3,1.7,12] | 1 |
| | [5,2,3.5,11] | 0 |
| | [4,1,2.9,10] | 0 |
| | [7,4,2.1,11] | 1 |
| Validation | [3,1,2.8,10] | 0 |
| | [7,3,1.8,11] | 1 |
| | [4,8,2.5,10] | 0 |
| | [4,1,3,1,11] | 1 |

| | | Predicted | |
|--------|---|-----------|-----|
| | | 1 | 0 |
| Actual | 1 | 0 | 1 |
| | 0 | 0 | 900 |

| P(1) | P(0) | \hat{y} | |
|------|------|-----------|---|
| 0.2 | 0.8 | 0 | ✓ |
| 0.9 | 0.1 | 1 | ✓ |
| 0.6 | 0.4 | 1 | ✗ |
| 0.3 | 0.7 | 0 | ✗ |

$(126 + 119) / (126 + 21 + 7 + 119)$
 $(0 + 900) / (0 + 50 + 50 + 900)$

Clustering

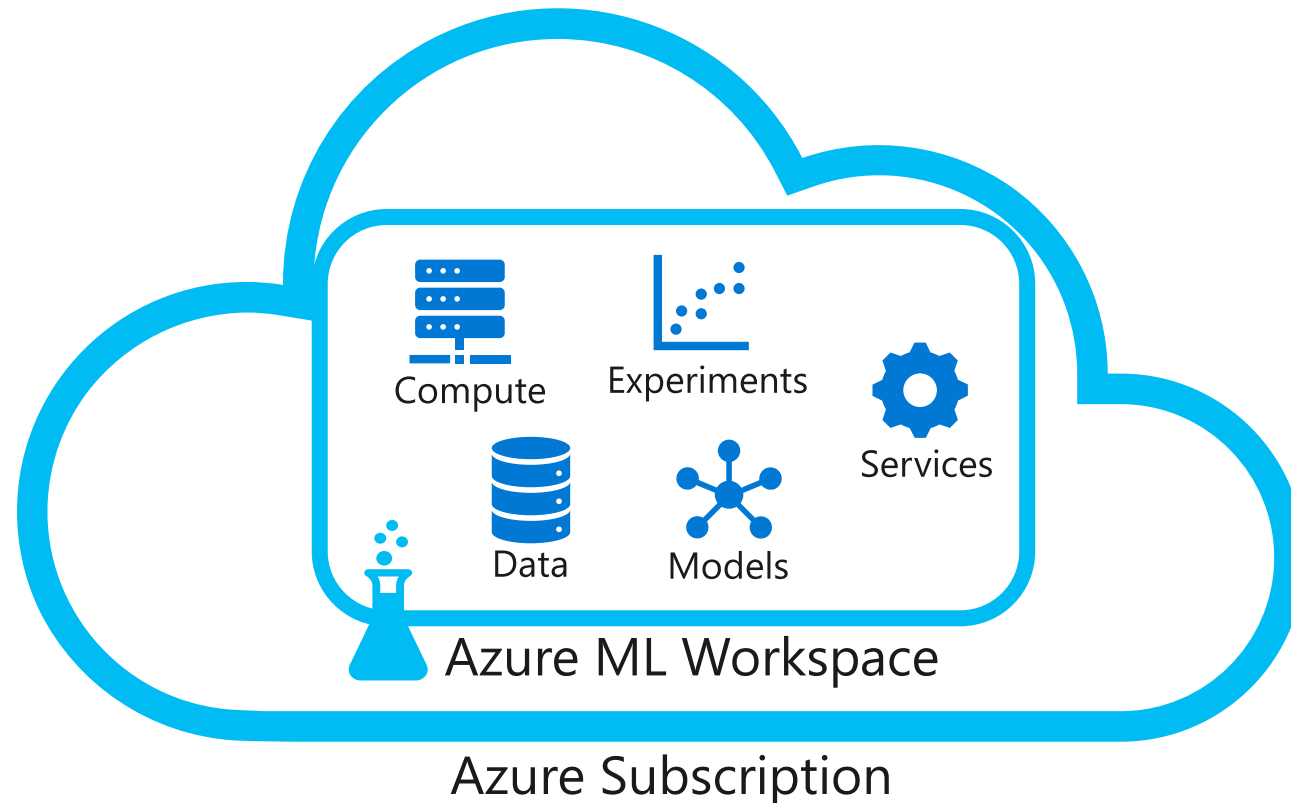

| |  |  |
|---|---|---|
|  | 6 | 3 |
|  | 5 | 3 |
|  | 2 | 3 |
|  | 1 | 3 |
|  | 3 | 8 |
|  | 4 | 8 |

Lesson 2: Azure Machine Learning

What is Azure Machine Learning?

A cloud-based platform for machine learning

Automated Machine Learning

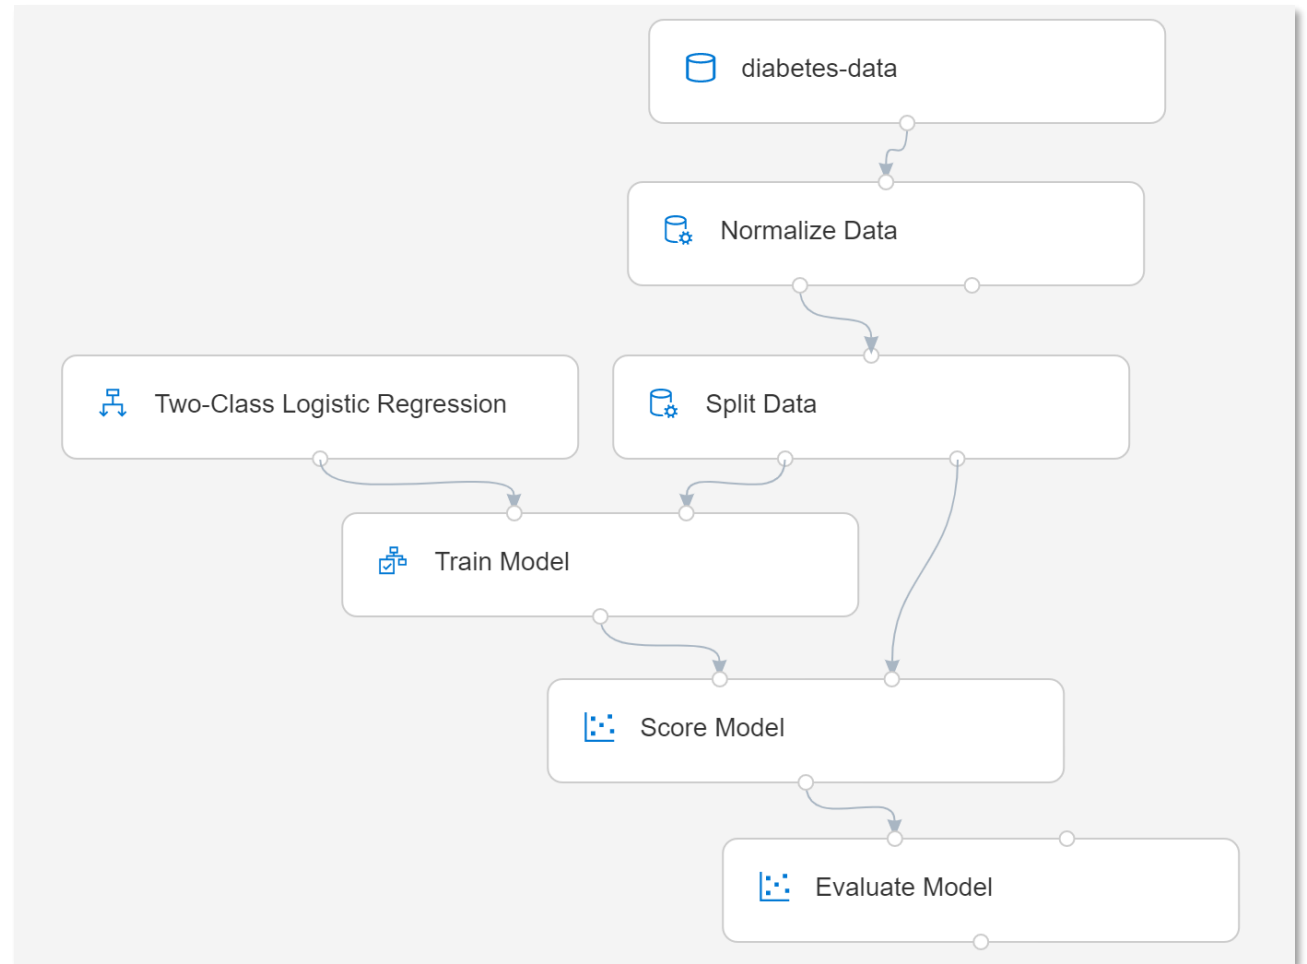

- Takes the hard work out of machine learning
 - Supply the data and desired model type, and let Azure Machine Learning find the best model

Azure Machine Learning *designer*

- Visual tool for creating a machine learning *pipeline*

1. Use a *training pipeline* to train and evaluate a model
2. Create an *inference pipeline* to predict labels from new data
3. Deploy the inference pipeline as a *service* for apps to use

DEMO

Azure Machine Learning

Module Overview

We covered the following concepts:

- Introduction to machine learning
 - What is machine learning?
 - Regression
 - Classification
 - Clustering
- Azure Machine Learning
 - What is Azure Machine Learning?
 - Azure Machine Learning designer
 - Automated Machine Learning

Computer Vision

Learning Objectives

You will learn the following concepts:

- Computer Vision Concepts
 - What is Computer Vision?
 - Applications of Computer Vision
- Computer Vision in Azure
 - Cognitive Services
 - Image Analysis with the Computer Vision Service
 - Training Models with the Custom Vision Service
 - Analyzing Faces with the Face Service
 - Reading Text with the Computer Vision Service
 - Analyzing Forms with the Form Recognizer Service

Lesson 1: Computer Vision Concepts

What is Computer Vision?

Applications of Computer Vision

Image Classification

Object Detection

Semantic Segmentation

Image Analysis

Face Detection & Recognition

Optical Character Recognition

DEMO

Computer Vision

Lesson 2: Computer Vision in Azure

Cognitive Services

- AI application resources in an Azure subscription:
 - Standalone resources for specific services
 - General *Cognitive Services* resource for multiple services
- Consumed by applications via:
 - A REST endpoint (https:// address)
 - An authentication key
- You will explore cognitive services using an online environment named Visual Studio Codespaces

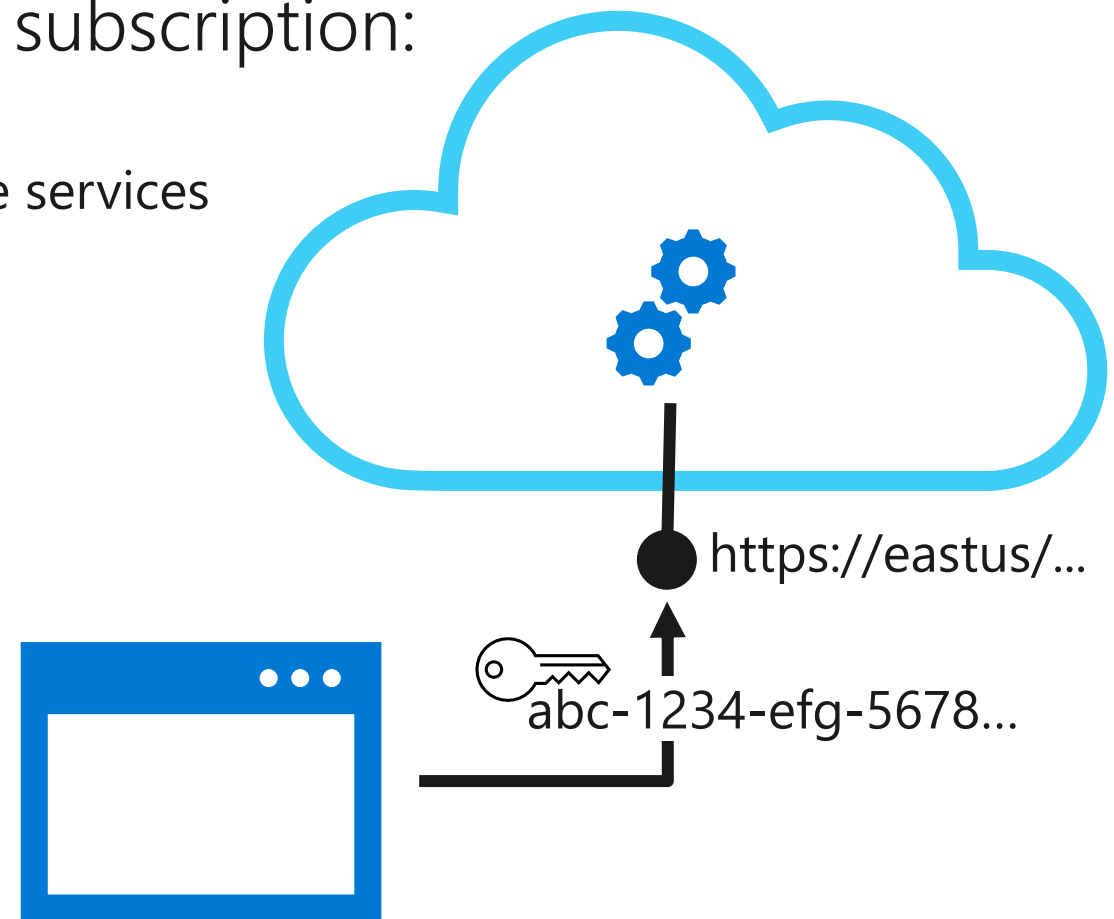

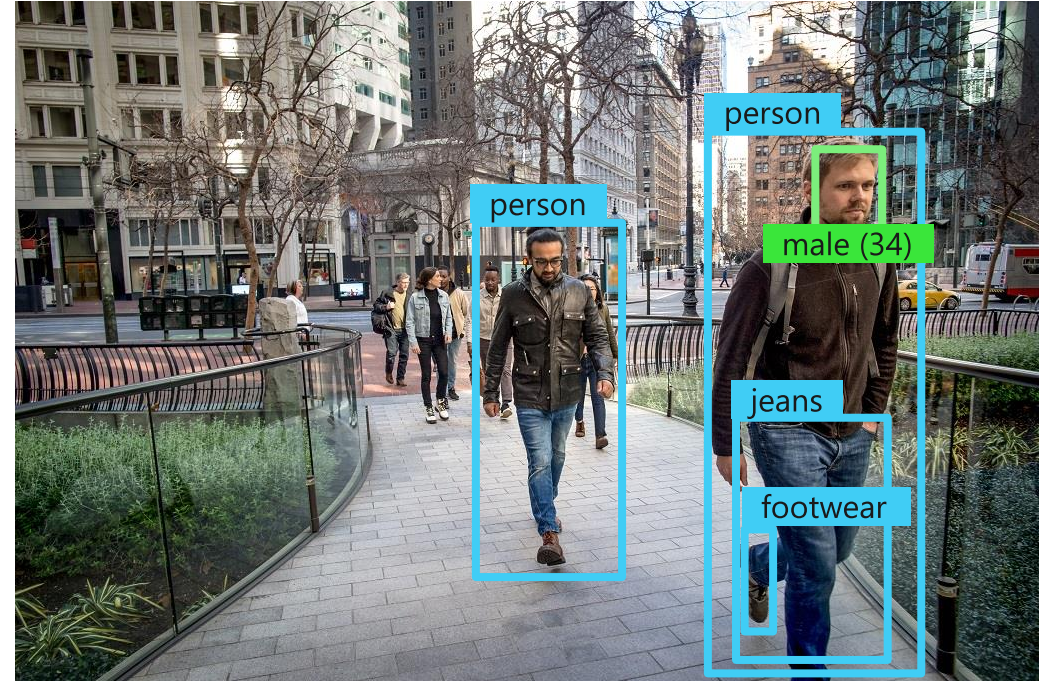

Image Analysis with the *Computer Vision Service*

- Pre-trained computer vision model
- Object detection for over 10,000 predefined classes
- Image description and tag generation
- Face detection and analysis
- Content moderation
- Text detection and OCR

Caption: a group of people walking on a sidewalk

Tags: building, jeans, street, outdoor, jacket, city, person

Ratings: Adult: False, Racy: False, Gore: False

Training Models with the *Custom Vision* Service

Image Classification

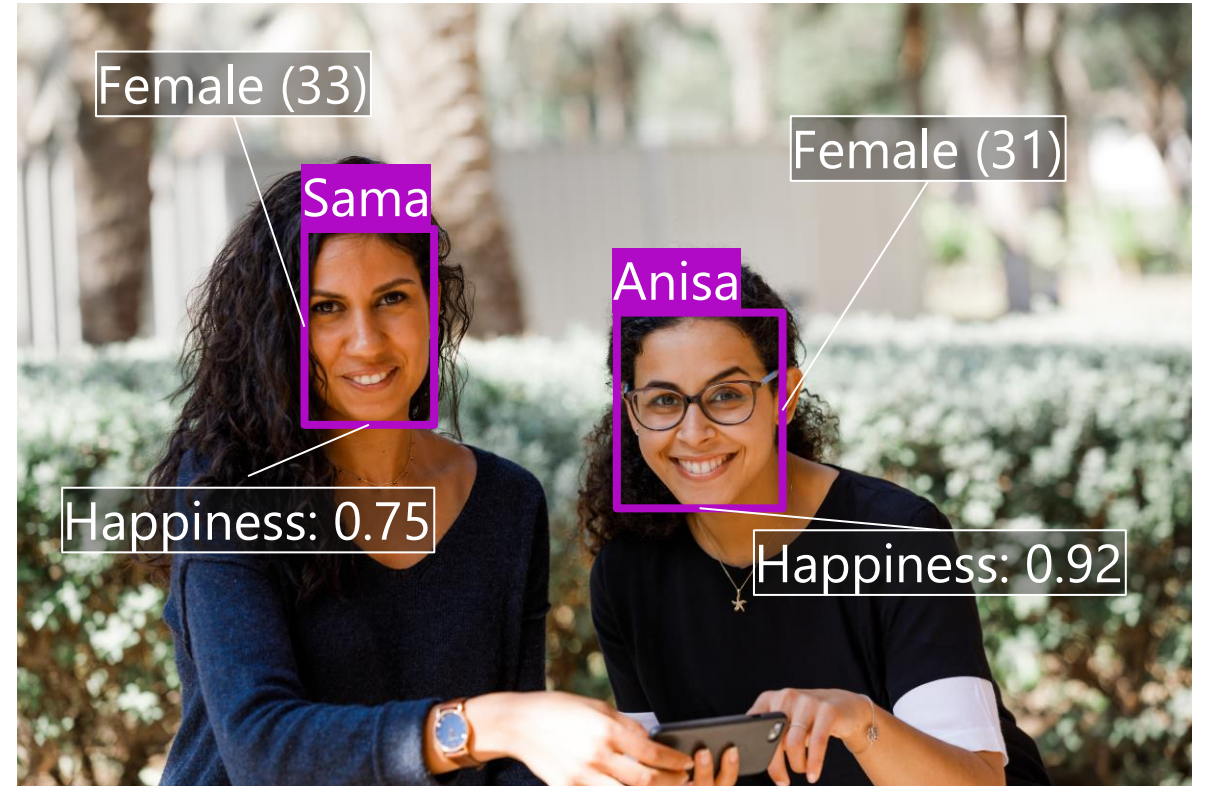

Object Detection

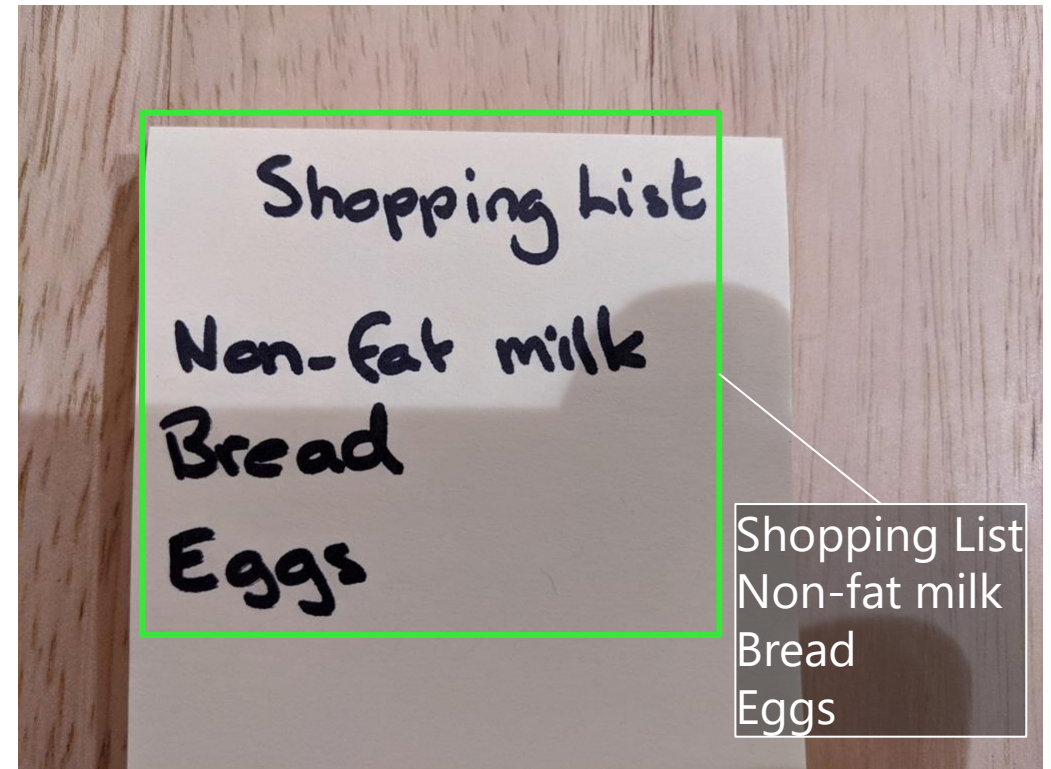

Analyzing Faces with the *Face* Service

- More facial analysis functionality than the *Computer Vision* service, including:
 - Facial attributes:
 - Gender
 - Age
 - Emotions
 - Facial recognition:
 - Similarity matching
 - Identity verification

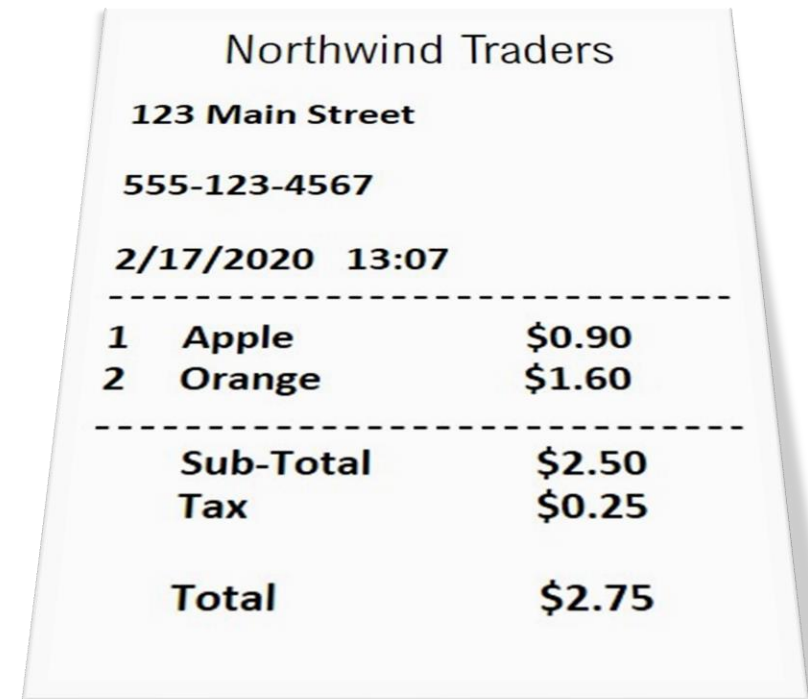

Reading Text with the *Computer Vision* Service

- Detect the location of text:
 - Printed
 - Handwritten
- Options for quick text extraction from images, or asynchronous analysis of larger scanned documents

Analyzing Forms with the *Form Recognizer* Service

- Extract information from scanned forms in image or PDF format
 - Train a custom model using your own forms
 - Use the pre-trained receipt model
- Models perform semantic recognition of form fields – not just text extraction

Northwind Traders
123 Main Street
555-123-4567
2/17/2020 13:07

| | | |
|---|--------|--------|
| 1 | Apple | \$0.90 |
| 2 | Orange | \$1.60 |

| | |
|-----------|--------|
| Sub-Total | \$2.50 |
| Tax | \$0.25 |
| Total | \$2.75 |

DEMO

Image Classification

Module Overview

We covered the following concepts:

- Computer Vision Concepts
 - What is Computer Vision?
 - Applications of Computer Vision
- Computer Vision in Azure
 - Cognitive Services
 - Image Analysis with the Computer Vision Service
 - Training Models with the Custom Vision Service
 - Analyzing Faces with the Face Service
 - Reading Text with the Computer Vision Service
 - Analyzing Forms with the Form Recognizer Service

Natural Language Processing

Learning Objectives

You will learn the following concepts:

- Introduction to Natural Language Processing
 - What is Natural Language Processing?
 - Natural Language Processing in Azure
- Using Natural Language Processing Services
 - Text Analytics
 - Speech Recognition and Synthesis
 - Translation
 - Language Understanding

Lesson 1: Introduction to Natural Language Processing

What is Natural Language Processing?

Text analysis and entity recognition

Sentiment analysis

Speech recognition and synthesis

Machine translation

Semantic language modeling

Natural Language Processing in Azure

Cognitive Services

Text Analytics

- Language detection
- Key phrase extraction
- Entity detection
- Sentiment analysis

Speech

- Text to speech
- Speech to text
- Speech translation

Translator Text

- Text translation

Language Understanding

- Custom language modeling

Conversational AI

Learning Objectives

You will learn the following concepts:

- Conversational AI Concepts
 - What is Conversational AI?
 - Responsible AI Guidelines for Bots
- Conversational AI in Azure
 - QnA Maker Service
 - Azure Bot Service

Lesson 1: Conversational AI Concepts

What is Conversational AI?

- A solution that enables a dialog between an AI agent and a human
- Generically, conversational AI agents are known as *bots*
- Bots can engage over multiple *channels*:
 - Web chat interfaces
 - Email
 - Social media platforms
 - Voice

Hi. I'm the Adatum support bot. How can I help you?

Adatum Support at 10:50 AM

I have a question about my bill

You

OK. What's your account number?

Adatum Support at 10:50 AM

123-45-678A

You

Alright. I've found your details.
Is your question about:

1. The bill amount
2. The due date
3. Something else

Enter 1, 2, or 3

Type your message here ...

Responsible AI Guidelines for Bots

1. Be transparent about what the bot can (and can't) do
2. Make it clear that the user is communicating with a bot
3. Enable the bot to seamlessly hand-off to a human if necessary
4. Ensure the bot respects cultural norms
5. Ensure the bot is reliable
6. Respect user privacy
7. Handle data securely
8. Ensure the bot meets accessibility standards
9. Assume accountability for the bot's actions

DEMO

Using a Bot

Lesson 2: Conversational AI in Azure

The QnA Maker Service

- Define a *knowledge base* of question and answer pairs:
 - By entering questions and answers
 - From an existing FAQ document
 - By using built-in *chit-chat*
- Consume the knowledge base from client apps, including bots

Azure Bot Service

- Cloud-based platform for developing and managing bots
- Integration with LUIS, QnA Maker, and others
- Connectivity through multiple channels

DEMO

Create a Bot

Module Overview

We covered the following concepts:

- Conversational AI Concepts
 - What is Conversational AI?
 - Responsible AI Guidelines for Bots
- Conversational AI in Azure
 - QnA Maker Service
 - Azure Bot Service

DEMO

Natural Language Processing

Lesson 2: Using Natural Language Processing Services

Text Analytics

I had a wonderful vacation in France.

- **Predominant Language:** English
- **Sentiment:** 88% (positive)
- **Key Phrases:** "wonderful vacation"
- **Entities:** France

Speech Recognition and Synthesis

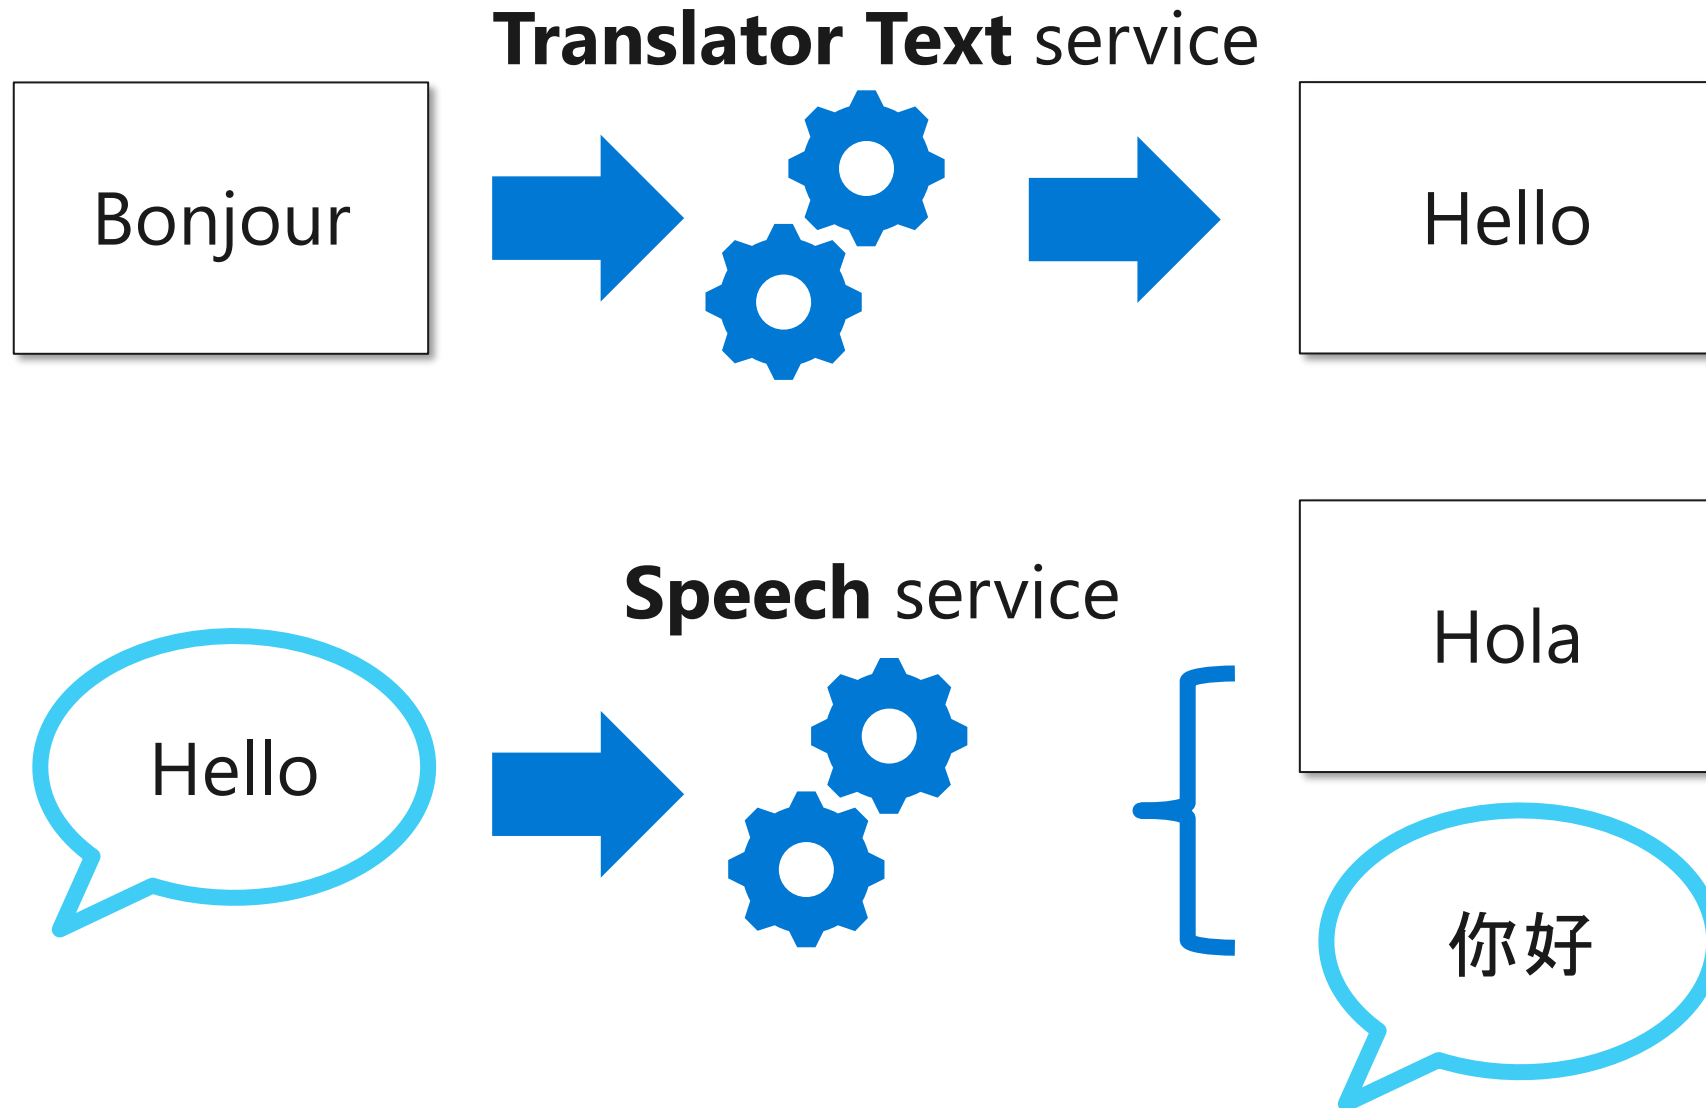

Use the *speech-to-text* capabilities of the **Speech** service to transcribe audible speech to text

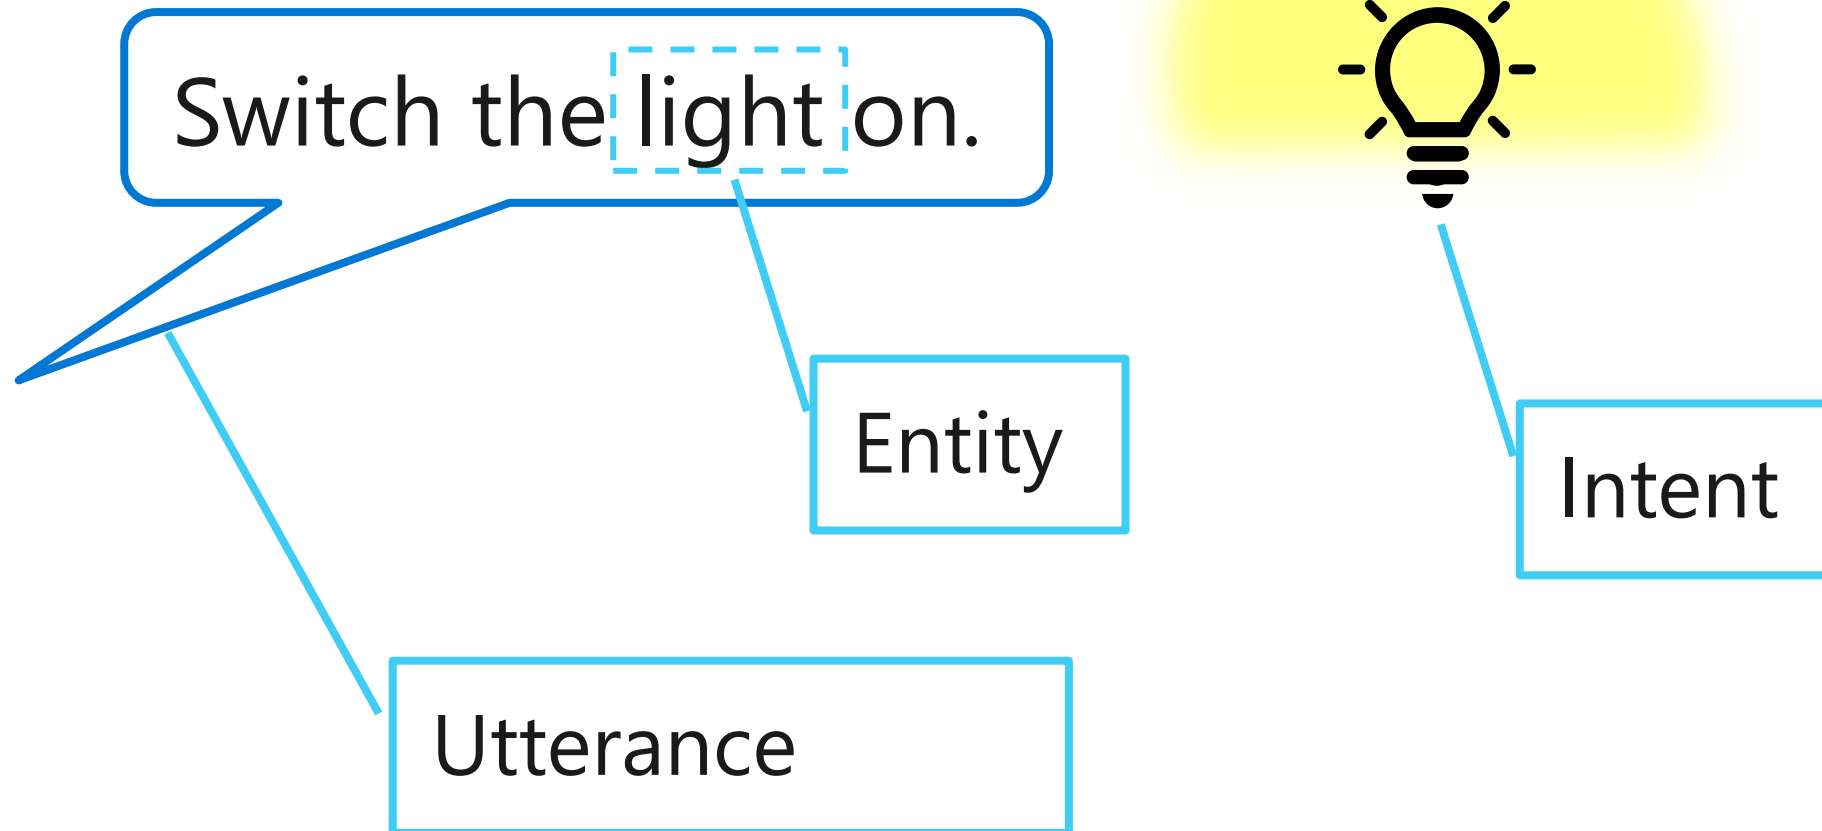

Use the *text-to-speech* capabilities of the **Speech** service to generate audible speech from text

Translation

Language Understanding

DEMO
